Connecting to a 802.1x wired Ethernet connection in Mac OS 10.9

1. Plug the Ethernet cable into to wall data port and your computer's ethernet port.

2. An authenticate box will appear if the port is 802.1x enabled. Enter your Edinboro Username and Password in the appropriate fields, and select OK.

3. 

4. If you entered your Edinboro Username and Password correctly you will then be asked to verify a certificate.

5. 
6.

7. Click **Continue** and enter your **Computer Account's Username** and **Password**. Then click **Update Settings**.

8.
